

QA Work Portfolio: REQ-FUN-05

Patient Details & Promo Code Engine | HealthCare Clinic Booking Platform | Team Bug Hunters

Project snapshot

Our team (**Bug Hunters**, 4 testers) ran a full manual testing project for a healthcare clinic booking platform: 7 functional requirements, one Jira sprint, from SRS analysis through test design, peer review, execution and bug reporting. Each tester owned specific requirements and peer reviewed a teammate's. This document summarizes my part.

39	8	4	2
Test cases designed (REQ-FUN-05)	Bugs reported (3 High, 4 Medium, 1 Low)	Jira tasks (design, execution, 2 reviews)	Requirements peer reviewed (REQ-FUN-03, 04)

What I worked on

Area	What I did
Requirements analysis	Read and analyzed all 7 requirements in the SRS and joined the team discussion, so I understood the whole booking flow, not only my part.
Test design	Owned REQ-FUN-05: Patient Details & Promo Code Engine . Designed 39 test cases in Jira with steps, test data and expected results (task HL-3).
Peer review	Reviewed the test cases of REQ-FUN-03 Doctor Search & Filtering (HL-15) and REQ-FUN-04 Doctor Profile & Schedule Grid Selection (HL-19). My own set was reviewed by a teammate.
Execution	Executed my test cases against the application (task HL-6).
Bug reporting	Logged 8 bugs in Jira with steps, expected vs actual result and severity, linked to the requirement.

Workflow followed

SRS → Requirement analysis → Team discussion → Divide requirements → Test analysis → Test case design → Review → Rework → Execution → Bug report → Bug lifecycle (fix, resolve, retest, close or reopen: simulated).

QA Work Portfolio: REQ-FUN-05

Patient Details & Promo Code Engine | HealthCare Clinic Booking Platform | Team Bug Hunters

Requirement under test: REQ-FUN-05

As a logged-in patient, I want to enter patient details and apply promo codes to calculate the final consultation price.

Rule	Specification
Patient selection	"Booking for Myself" (default) vs "Booking for Someone Else".
Beneficiary	Name: alphabetic + spaces, 3-50 chars. Phone: 11-digit Egyptian format.
Promo input	Up to 15 chars, alphanumeric + hyphens. Input is trimmed and uppercased.
Codes	SAVE10: -10%. FLAT50: -50 EGP. BEST-QA: -100% (total 0 EGP).
Validation	Unrecognized code: "Invalid or expired promo code." One promo per booking session. Total never below 0 EGP.

Test design coverage (39 test cases)

Area	Count	Scenarios covered	Jira IDs
Patient selection	3	Default is "Myself", switch to "Someone Else", book for myself end to end.	HL-86, 87, 124
Beneficiary name	7	Valid 3-50 chars, boundaries (2 and 51 chars), spaces, digits and symbols.	HL-88, 89, 91-95
Beneficiary phone	7	Valid prefixes 010 / 011 / 012 / 015, invalid prefix, too short, letters and symbols.	HL-96 to 102
Promo: valid codes	4	SAVE10, FLAT50, BEST-QA discount and message checks.	HL-103, 104, 105, 110
Promo: case and hyphens	5	Mixed-case input and hyphenated variants.	HL-107, 108, 109, 111, 112
Promo: trim	3	Leading and trailing spaces.	HL-116, 117, 118
Promo: invalid input	5	Empty, special characters, unknown code (SAVE20).	HL-106, 113, 114, 115, 119
Promo: length	3	14, 15 and 16 character codes.	HL-120, 121, 122
Promo: once per session	1	Apply button disabled after a code is applied.	HL-123
Fee floor	1	Total after discount never falls below 0 EGP.	HL-141

QA Work Portfolio: REQ-FUN-05

Patient Details & Promo Code Engine | HealthCare Clinic Booking Platform | Team Bug Hunters

Bug reports (8)

All bugs were logged in Jira with reproduction steps (log in as a patient, choose a doctor slot, apply the input, observe), expected vs actual result, and severity.

ID	Summary	Severity	Expected	Actual
HL-133	Beneficiary Name accepts 51 chars	Medium	Validation message shown and form blocked.	Name is trimmed to 50 chars and the booking is confirmed.
HL-134	BESTQA rejected as invalid code	High	100% discount applied, total = 0 EGP.	"Invalid or expired promo code."
HL-135	SAVE-10 rejected (hyphens should be accepted)	Medium	Discount applied, -10 EGP.	"Invalid or expired promo code."
HL-136	FLAT-50 rejected (hyphens should be accepted)	Medium	Discount applied, -50 EGP.	"Invalid or expired promo code."
HL-137	BEST-QA treated as already applied on first use	High	Discount applied, total = 0 EGP.	"A promo code has already been applied to this booking."
HL-138	bESTqA rejected (input should be case-insensitive)	Medium	Input normalized to uppercase and accepted.	"Invalid or expired promo code."
HL-139	Spaces around BESTQA are not trimmed	High	Input trimmed and accepted.	"Invalid or expired promo code."
HL-140	Promo field limited to 10 chars instead of 15	Low	Field accepts up to 15 characters.	Field accepts only 10 characters.

My Jira tasks and peer reviews

Task	Jira ID	Linked to	What it covered
Test Case Design 05	HL-3	REQ-FUN-05 (HL-2)	39 test cases linked to the requirement.
Test Case Execution 05	HL-6	REQ-FUN-05 (HL-2)	Execution of the test cases; failures reported as bugs.
Test Case Peer Review 03	HL-15	REQ-FUN-03 (HL-13)	Review of Doctor Search & Filtering test cases.
Test Case Peer Review 04	HL-19	REQ-FUN-04 (HL-17)	Review of Doctor Profile & Schedule Grid Selection test cases.

Appendix: test case list (REQ-FUN-05)

Titles as written in Jira; IDs are Jira keys.

ID	Test case title
HL-86	Verify that patient selection by default is Booking for Myself
HL-87	Verify that patient can Book for Someone Else
HL-88	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Name (Alpha, 3-50 chars)
HL-89	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Name (Alpha, 3-50 chars)
HL-91	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Name (Alpha, 3-50 chars)
HL-92	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Name (Alpha, 3-50 chars)
HL-93	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Name (Alpha, 3-50 chars)
HL-94	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Name (Alpha, 3-50 chars)
HL-95	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Name (Alpha, 3-50 chars)
HL-96	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Phone (11-digit EG format).
HL-97	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Phone (11-digit EG format).
HL-98	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Phone (11-digit EG format).
HL-99	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Phone (11-digit EG format).
HL-100	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Phone (11-digit EG format).
HL-101	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Phone (11-digit EG format).
HL-102	Verify that by Selecting "Booking for Someone Else" requires Beneficiary Phone (11-digit EG format).
HL-103	Verify that Promo Input: Up to 15 chars; Alphanumeric
HL-104	Verify that Promo Input: Up to 15 chars; Alphanumeric
HL-105	Verify that BESTQA Promo Code Applies the Expected Discount Without Reducing Total Below 0 EGP
HL-106	Verify that Promo Input: Up to 15 chars; Alphanumeric + Hyphens.
HL-107	Verify that Promo Input: Up to 15 chars; Alphanumeric.Uppercase normalization.
HL-108	Verify that Promo Input: Up to 15 chars; Alphanumeric + Hyphens.
HL-109	Verify that Promo Input: Up to 15 chars; Alphanumeric + Hyphens.
HL-110	Verify that Promo Input: Up to 15 chars; Alphanumeric + Hyphens.
HL-111	Verify that Promo Input: Up to 15 chars; Alphanumeric.Uppercase normalization
HL-112	Verify that Promo Input: Up to 15 chars; Alphanumeric & uppercase normalization.
HL-113	Verify that Promo Input: Up to 15 chars; Alphanumeric
HL-114	Verify that Promo Input: Up to 15 chars; Alphanumeric
HL-115	Verify that Promo Input: Up to 15 chars; Alphanumeric
HL-116	Verify that Promo Input: Up to 15 chars; Alphanumeric + Hyphens & Input triggers trim
HL-117	Verify that Promo Input: Up to 15 chars; Alphanumeric + Hyphens & Input triggers trim
HL-118	Verify that Promo Input: Up to 15 chars; Alphanumeric + Hyphens & Input triggers trim
HL-119	Verify that Promo Input: Up to 15 chars; Alphanumeric + Hyphens & Unrecognized codes trigger
HL-120	Verify that Promo Input: Up to 15 chars; Alphanumeric
HL-121	Verify that Promo Input: Up to 15 chars; Alphanumeric
HL-122	Verify that Promo Input: Up to 15 chars; Alphanumeric
HL-123	Verify that Promo Input applied once per booking session
HL-124	Verify that Patient could Booking for himself/herself
HL-141	Verify that Total fee after discount cannot fall below 0 EGP.
